

Volume 5. Wilhelmine Germany and the First World War, 1890-1918  
Industrial Unrest (1890-1913)

With the expiration of the Anti-Socialist Law on September 30, 1890, the Socialist movement in Germany gathered strength. The Social Democratic Party encouraged organized resistance to factory conditions, and strikes proliferated, especially after the turn of the century.

**I. Strikes, Lockouts, and “Non-Confrontational Movements,” 1890-1913**

Year	Strikes incl. Lockouts <sup>1,2</sup>				Strikes <sup>4</sup>			
	Number	Participants	Duration <sup>3</sup>	Calculated number of participants <sup>3a</sup>	Number	Participants	Duration <sup>3</sup>	Calculated for participants <sup>3a</sup>

1913	427	71,392	1,532,314	45,339	7,372	965,573	311,048

- 1) The editors (Hohorst, et. al.) would like to thank Klaus Tenfelde for preparing these tables.
- 2) For the entire period in question, the figures for the first three categories also include lockouts, but not non-confrontational movements.
- 3) Duration of the strikes until 1899 in weeks (= sum total of the duration of all strikes, regardless of the number of participants); beginning in 1900 (in all categories): loss of work time in days (calculation based on the number of participants).
- 3a) The statistics of the "Generalkommission" determine the loss of work time in days only for a certain number of participants, which fluctuates between 56.8% and 97.5% of the total number of striking workers.
- 4) Separate counting possible only after 1900.
- 5) That is to say, "movements without work stoppage;" recorded beginning in 1905 and not included in the preceding figures for the total number of strikes.
- 6) For these years the data has been recorded together.
- 7) The official strike statistics are included because of the at times astonishing difference between its numbers and those of the statistics compiled by the unions. They begin in 1899 (see *Statistik des Deutschen Reichs N.F.*, vol. 134, Berlin 1900, pp. I-XI). While the statistics of the "Generalkommission" recorded only the strikes in which members of its trade associations participated, the official strike statistics generally counted all strikes. Still, in some years the number of participants falls below that of the "Generalkommission," which criticized that not all workers' struggles were recorded.

For a comparison between the official and the union strike statistics see: C. Heiss, "Die deutsche Streikstatistik," *Archiv für soziale Gesetzgebung und Statistik* 17 (1902): 150-168; M. Meyer, "Zur Reform der Streikstatistik," *Jahrbücher für Nationalökonomie und Statistik*, 3. Folge 37 (1909): 204-218; Karl Oldenberg, article "Arbeitseinstellungen in Deutschland," in *Handwörterbuch der Staatswissenschaften*, vol. 1., 3rd ed. (Jena, 1909), pp. 927-964, esp. 948-957; also: "Die Streiks nach der amtlichen und der gewerkschaftlichen Statistik," regularly in *Correspondenzblatt der Generalkommission der Gewerkschaften Deutschlands*; e.g., vol. 23 (1913): 793-799. Finally, on the state of research: Hartmut Kaelble and Heinrich Volkmann, "Konjunktur und Streik während des Übergangs zum Organisierten Kapitalismus in Deutschland," *Zeitschrift für Wirtschafts- und Sozialwissenschaften* 92 (1972): 513-544, esp. 513 note 1, p. 515 note 5.
